

READ THIS FIRST! Instructions for online PWR disclosure application

Fill out the online application form fully before attempting to submit. The Submit button is at the bottom of the form. Some safeguards have been built in to make certain all required information has been filled out. If certain items are missing the Submit button will not appear or Error messages will appear.

If you have a dynotest done in 2026 (or later) be certain to upload both the graph **and the data** as required by the rules. If you are using an existing 2025 dynotest as an exception for 2026 as stated in the rules you can upload the properly annotated dynograph only.

A copy of the Dyno test results should be submitted in original PDF format generated by the dynotest equipment. The dyno graph should clearly show 3 runs and the peak HP of each.

The online form can be used to test results of Power Metric, Weight and Modifiers to see how it affects the Power to Weight ratios, without and with the modifiers before submitting. To save any information temporarily you can leave the form open on your browser or use the Save button at the bottom of the form. JotForm will require you open an account to use this feature, and you will receive a notice on how to re-open the “saved” information. Due to the peculiar aspect of JotForm, the actual form cannot be saved in its completed form on your browser (when you click save it will save it in “blank” mode)

Please note applications cannot be submitted for approval at a race event and must be submitted for approval at least 10 business days prior to the first scheduled race weekend. If an application is submitted within the 10-business day window prior to the planned race weekend, the possible approval of the late disclosure sheet is on a best effort basis and will be assessed a \$100 fee. There is no guarantee of processing/approving an application within the 10 business day window prior to a race.

Once submitted, your application will be verified by Club Racing, and an official approved disclosure sheet will be returned to you via E-mail. The official copy will be in pdf form for you to print out and bring with you to race events to be presented to the Event Tech Steward.
